ARVADA

CREEKSIDE PARK TRAIL IMPROVEMENTS

Construction Notice

As part of the City of Arvada's ongoing efforts to update the quality and safety of their many parks and trail systems, a plan has been developed to provide much needed improvements to the Ralston Creek Trail through Creekside Park. The existing 8' wide trail and low-water crossings will be removed and replaced with a 10' wide trail and a single 50' span pedestrian bridge. The project also includes storm drainage improvements, creek bank rehabilitation, seating areas and landscape and irrigation improvements. In addition, several existing trees determined to be in poor health will be removed and replaced with new trees.

The project has been awarded to Goodland Construction and will be under construction through the spring of 2010. Due to safety issues, the trail and park will be closed for the duration of the project. We ask for your cooperation in adhering to all posted signs and staying out of all fenced construction areas. Thank you!
