

Theme: taking lasting care of existing assets

- 1) Is there a mandate associated with the project?
- 2) Does the project address safety or liability (i.e. pedestrian access, buildings)?
- 3) Does this project address an imbalance in service delivery to underserved population (e.g., disabled access, park/rec in SE Arvada)?
- 4) Does the project save costs over the lifecycle of the project or generate revenue?
- 5) Does the project facilitate sales tax generation (i.e. transportation access where majority of sales tax is generated in the city) through maintenance and capital maintenance?
- 6) Does the project maintain existing infrastructure – maintenance?
- 7) Does the project recapitalize existing infrastructure – capital maintenance?

Thanks, Michelle
